

**You've done everything
you can to:** Modernize.

Digitize

Revitalize

the way your company works...

Or Have You?

CUSTOMS COMPLIANCE SOLUTIONS

If Your Customs Process Are Labouring Under ‘Last Century Technology’

There’s Still Some Work Left To Do.

& MSR Can Help

Staying on the cutting edge is the key to competing successfully in today’s highly competitive and volatile marketplace.

And you’re doing a good job of that. Your vision is clear. Your objectives are well defined. Your methods are sound. And you’ve made a lot of improvements in the way your business systems run.

But if you’re still using a customs broker who is mired in ‘last century technology’ to manage your customs processes, you’re missing out on a wide range of improvements and innovations that could be saving you time, money and a lot of grief when it comes to the movement of your goods.

How do we know? We’re MSR and we have pioneered a great many of these improvements and innovations. We offer our brokerage clients a real competitive advantage with cutting edge customs process management across their entire supply chain.

E.R.I.N. Keeps Everybody, And We Mean Everybody, In The Information Loop.

*One example of an exclusive MSR innovation is called **E.R.I.N.**, which is short for **Enhanced Release Information Network**.*

***E.R.I.N.** is a revolutionary system that delivers customs release information using the internet. **E.R.I.N.** delivers this release information, in real time, to anywhere an email can be received, including to most wireless devices.*

***E.R.I.N.** delivers this release information to all the people in your supply chain who need to know -- staff, carriers, warehouses, cartage companies, production, purchasing and distribution people. Whoever. Wherever you want it to go.*

*MSR innovations like **E.R.I.N.** harness the power of the internet to help your business run more smoothly and profitably.*

Think about that and you’ll start to get an idea of just how much improvement and innovation your relationship with MSR can include.

Think about it some more and you’ll realize that the average customs brokerage (yours?) may just be far enough behind the cutting edge to actually be slowing your business down.

MSR. Cutting Edge Customs Processes For Forward Thinking Companies Like Yours.

*At MSR we believe, and have for more than 20 years, that the customs processes are more than just a semi-conscious paper push. Like any other business system, they’re about **cutting costs, expediting movement, streamlining processes and giving you as much control and intelligence as possible.***

*Innovations like our **E.R.I.N.** customs release notification service are just the tip of the MSR iceberg.*

But it’s a very important part of the reason why you should be asking yourself if you want to be dealing with a customs broker who is on the cutting edge, or with one with no edge at all.

CUSTOMS COMPLIANCE SOLUTIONS
