

## WE'LL HELP YOU TAKE SOME OF THE 'HYPER' OUT OF YOUR HYPERACTIVITY.

There was a time when every candle had both ends burning in your practice. Then one day you realized that running it instead of letting it run you is an infinitely preferable option. This is the same conclusion that many of our best referral clients are coming to as they start to re-allocate their personal energy supplies. At Howie, Sacks & Henry, our specialty is personal injury law. That's all we do. And we do it very well. We honor all referrals and genuinely respect all our professional relationships. If it's time for you to start an energy saving program of your own, maybe it's time we had a conservation conversation. **We're on your side.**

"Most of the personal injury law firms that advertise in legal publications do what we call 'ugly fat business cards'. Designer/Associate Bill Tibbles and I thought, now here's an opportunity to position our client, HS&H, uniquely simply by doing a series of 'creative' ads. So we did and needless to say, HS&H quickly became one of the GTA's most referred personal injury firms... and that business growth continues today."

If you'd like to have this level of strategic & creative thinking working for you, we should have a chat.
